

# AquaCaddy

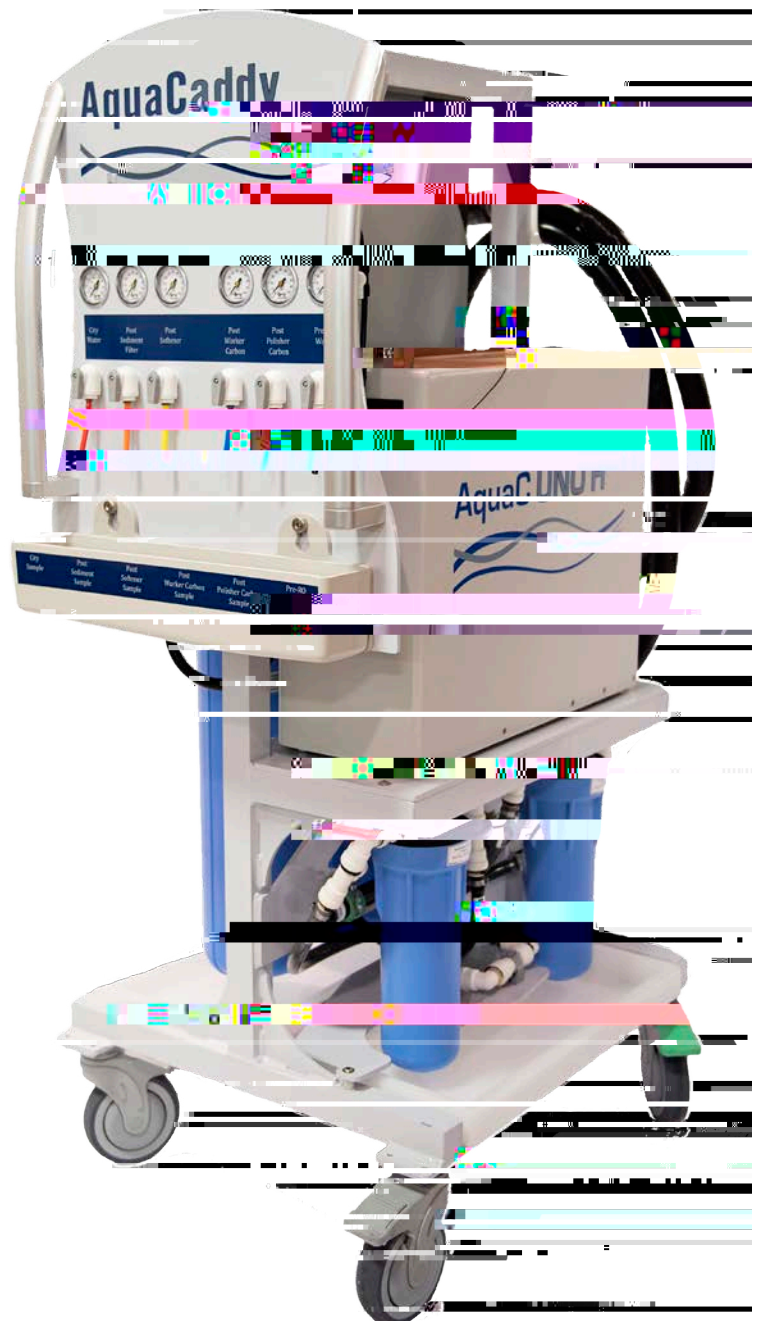

# AquaCaddy

The AquaCaddy is a portable water treatment system that can be used in a variety of settings. It is designed to provide clean, safe drinking water for up to 100 people per day.

It is a compact, lightweight unit that can be easily moved and stored. It is ideal for use in remote areas, construction sites, and emergency relief operations.

It is a simple to use and maintain system that requires no electricity. It is a cost-effective solution for providing clean water to communities in need.
